REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record, which is the most pertinent art found, fails to teach and/or fairly suggest the instant invention. The addition of the phrase "having an alkali metal equivalent greater than 1% Na₂O equivalent" overcomes the 103 rejections over the Sommer et al references as these references teach against an accelerator composition in which the alkali metal equivalent is greater than 1% Na₂O equivalent. Since the only rejection remaining in this application is a provisional obviousness-type double patenting rejection over copending Application No. 10/544,979, the examiner is withdrawing this rejection and passing this application to issue as per MPEP 804 I.B and MPEP 1490 [R-3] V.D as a terminal disclaimer has been filed in the copending application.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony J. Green whose telephone number is 571-272-1367. The examiner can normally be reached on Monday-Thursday 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on 571-272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
